About Me

An Enthusiastic Blockchain Developer, who develops and builds smart contracts, Dapps, NFTs and cryptocurrency.

Worked on two NFT projects, deployed the smart contract and created a minimized minting Dapp for the projects.

I am a voracious consumer of knowledge in relation to what interests me. I have a peculiar cycle of learning and teaching.

I want the world to feel my impact through blockchain development by contributing meaningfully to the world's transition into Web3.

Experience

NFT Artist & Developer

04/2022 - 07/2022
Nigeria

AK & DOKS

- Promotion and discord server management.

Skills

Blockchain Technology · Javascript
Web3 · Smart Contracts · NFT · React
Hardhat · CSS · HTML · Solidity

Education

FreeCodeCamp

07/2022 - 10/2022
Website, Youtube

Polygon Africa
Bootcamp
(Master track, hackathon)

10/2022 - present
Virtual, Online, Remote

Strengths

Problem-Solving

Providing long-lasting value-based solution is a priority. Ability to contribute meaningfully in a team or solo project(s) and solve problems.

Attention to Detail

Paying strict attention to details is crucial because even an unimportant error could ruin the code.

Prioritizing

Prioritizing is why I use 100% of my energy and mental capacity for the most complex and thought-provoking tasks.

Industry Expertise
